Thanks Kirsten for pointing out this very obvious missing detail, deadlines!

Let's aim to get these letters back to UC Davis by Thursday May 21, 2020 (~2 weeks). If you anticipate challenges with this deadline (especially for partners in mandatory countries), please keep me informed.

David

Thanks David. What's our final deadline for getting these back to you, for assembling into the Annex of the proposal? -Kirsten

Hi there,

I'm attaching templates for the letters of commitment and support we need for the STOP Spillover package. As we discussed today we really want to get moving on these especially for the mandatory country partners,

though it's also important to showcase our global network and connections for the additional ("optional") countries listed in the NOFO.

A few notes:

- **Letters of commitment** are for partners that will be included financially in the project and engaged in implementation (consortium and sub-recipients). I realize we are still ironing out details for some country-level partners on the sub-recipient side but we will work quickly to move forward with decisions.
- **Letters of support** are for partners, individuals or institutions but do not involve financial/implementation commitment. Feel free to begin working with any partners where strategic alliance or support will enhance the value of our proposal.

Completely fine to return them to me via email once the letters have been signed and endorsed.

Let me know if you have any questions,

David
